EXPLANATORY NOTES

This bulletin contains, for each month from June, 1954 to June, 1961, particulars of the principal series of estimates of wage and salary earners in employment for which current figures are published in the monthly bulletin Employment and Unemployment. It supersedes an earlier issue in the series - Wage and Salary Earners in Employment, June 1954 to June 1962 (S.B. 79) - and provides a more detailed dissection of industry sub-groups for Australia (Section I), as well as new tables showing industry series for males and females in each State (Section II). The series are comparable with those recently published in Wage and Salary Earners in Employment, June 1961 to June 1965 (S.B. 295).

2. The series contained in this bulletin, except those relating to government employees and defence forces, are based on comprehensive data (referred to as "benchmarks") derived for the purpose from the population censuses of June 1954 and June 1961. Figures for periods between the two benchmark points of time are estimates obtained from three main sources, namely, (a) Pay-roll Tax returns; (b) returns from Government bodies; and (c) some other direct current records of employment (e.g. for hospitals). Data from these sources have been supplemented by estimates of changes in the number of wage and salary earners not covered by the foregoing collections.

3. Particulars of employment obtained from other collections, such as the annual factory census and the censuses and sample surveys of retail establishments, have been used to check, and, where desirable, to revise estimates in relevant sections.

4. The benchmark figures were derived from particulars recorded for individuals on population census schedules, while the estimated monthly figures were derived mainly from reports supplied by employers, relating to enterprises or establishments. Because the two sources differ in some cases in scope and in reporting of industry, the industry dissection of the benchmark totals was adjusted to conform as closely as possible, to an enterprise/establishment reporting basis. The industry classification used throughout the series is that of the population census of June, 1961.

5. Pay-roll Tax returns are lodged at present by all employers paying more than \$400 a week in wages (other than certain Commonwealth Government bodies, religious and benevolent institutions, public hospitals and other similar organizations specifically exempted under the Pay-roll Tax Assessment Act 1941-1965). At June, 1954, this Act required employers paying wages of more than £80 (\$160) a week to lodge returns. The exemption limit was raised to £120 (\$240) a week from 1st September, 1954, and to the present level as from 1st September, 1957.

6. Employees in rural industry and in private domestic service are not included in the estimates, because of the inadequacy of data.

7. The figures herein relate to "wage and salary earners" on payrolls or "in employment" in the latter part of each month as distinct from numbers of employees actually working on a specific date. They include some persons working part-time.

8. The prime purpose of this series is to measure, as nearly as may be with available data, monthly trends in employment in the defined field. The estimates are subject to less reliability for longer term measurement.

NOTE. - Any discrepancies between totals and sums of components are due to rounding.
